

## Vacancy

The department of Translational Genomics at the University of Cologne is hiring a **student assistant for 6-8 hours per week** (preferably from the field of biology, medicine or similar) as soon as possible.

We research genetic changes in cancer with the aim of developing new approaches to diagnostics and therapy. Our department includes employees from the fields of medicine, biology and physics. Our projects are highly multidisciplinary and involve a variety of collaborations.

We are looking for interested and committed students who already have knowledge in the field of laboratory work and would like to deepen it.

### Tasks:

- Receiving and storage of human tumor samples
- Processing of tumor samples (preparation of cryosections, HE stains)
- Extraction of nucleic acids from tumor tissue, blood, FFPE slices and cell lines (DNA and RNA extractions)
- General laboratory work

### Requirements:

- Independent and reliable way of working
- Knowledge and practical experience in the field of molecular biology
- ability to work in a team

Have we piqued your interest? Then please send your application summarized in one pdf file via e-mail to: [gbosco@unikoeln.de](mailto:gbosco@unikoeln.de)

The application period ends on February 4th, 2022.
